OPERATING PRINCIPLE FOR OIL LEVEL CONTROLLERS

Kenco oil level controllers are designed to maintain the running oil level in the crankcase of stationary engines, compressors, and mechanical lubricator boxes. The Kenco oil controller works in conjunction with an overhead oil supply system which feeds the oil level controller. As the oil is consumed, the oil controller supplies the required oil. The oil controller controls the amount of oil in the crankcase by a float controlled valve. The valve opens and closes as oil is needed in the crankcase to provide a constant oil level.

OPERATING PRINCIPLE FOR OIL LEVEL SWITCHES

Oil level switches are designed as a safety device for the stationary engine or compressor. The oil level switch monitors the oil level in the crankcase. The level within the crankcase directly corresponds with the oil level in the oil level switch housing. The engine or compressor constantly consumes the oil from the crankcase. If the oil level in the crankcase drops past the designated level, the switch will trip and trigger an alarm.

FEATURES

- Reduces maintenance by maintaining a constant oil level
- Protects against lubrication failure
- Controller mechanism fully removable without draining oil
- Easy view convex sight window
- Low to high pressure applications
- Oil inlet allows for piping configurations from any direction
- Oil outlets on either side of housing and in the bottom to allow for various piping configurations
- Easy access to switch float through 3/8” vent hole in top of housing for simple testing of switch operation
- Direct mount adapters eliminate equalizing problems and reduce installation costs
- CSA and ATEX explosion proof certification for hydrogen gas environments now available on KLCE/KHL/KSHL/KSLL/KES models
- Oil level controllers for synthetic oil applications now available

APPLICATIONS

- Stationary engines
- Stationary compressors
- Mechanical lubricators
- Pumps

Featured above and on cover: KLCE-9 is an oil level controller with an electric switch in an explosion proof enclosure with a slotted universal mounting bracket.

Featured at right: KLCM-9 is an oil level controller with an electric switch in a Type 4 enclosure with a slotted universal mounting bracket.

MODEL SPECIFICATIONS

MODEL K512 OIL LEVEL CONTROLLER WITH CASE-TO-GROUND ELECTRIC SWITCH; ALSO K512-TB/K512HL /K512HL-TB

Application of Model K512:
The Kenco K512 utilizes the operating principles of both the oil level controller and the electric switch. The case-to-ground switch and the circuit will remain open until the oil level drops 1/2” below the centerline of sight window. The K512 is for non-hazardous locations and locations where space is limited.

Application of Model K512-TB:
The Kenco K512-TB is constructed with a switch contact test button to easily check for proper wiring installation and system response to a low oil level condition.

Application of Model K512HL:
The Kenco K512HL is constructed with one case-to-ground switch contact circuit that remains open until the oil level is 1/2” above or 1/2” below the centerline of sight window.

Application of Model K512HL-TB:
The Kenco K512HL-TB is constructed with a switch contact test button to easily check for proper wiring installation and system response to a low or high oil level condition.

Standard Materials of Construction:
Valve Seat: Nitrile (Fluorocarbon also available)
Housing and Valve Orifice Material: Aluminum
Float Material: Closed Cell Polyurethane
Oil Inlet Screen: 20 Mesh Brass Cloth
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

MODEL KLC OIL LEVEL CONTROLLER

Application of Model KLC:
To supply and control the amount of oil in the crankcase.

Standard Materials of Construction:
Valve Seat: Nitrile (Fluorocarbon also available)
Housing and Valve Orifice Material: Aluminum
Float Material: Closed Cell Polyurethane
Oil Inlet Screen: 20 Mesh Brass Cloth
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

Process Connections:
Oil Inlet Connection Size: 1/2” FNPT
Oil Outlet Connection Sizes: (2) 1/2” FNPT Side Ports (1) 3/4” FNPT Bottom Port

Flow Rate Test Results:
(Standard unit tested at 32°F, SAE 30)
2’ Head: 1.45 GPH
4’ Head: 2.46 GPH
6’ Head: 3.49 GPH
(HPA unit tested at 32°F, SAE 30)
10 psi: 4.09 GPH
(HPB unit tested at 32°F, SAE 30)
36 psi: 3.38 GPH
70 psi: 6.92 GPH

Also Available:
SYN: Synthetic Oil Applications—Contact Kenco with Type and Specific Gravity of oil used in the application.
MODEL SPECIFICATIONS

MODEL KLCE OIL LEVEL CONTROLLER WITH ELECTRIC SWITCH IN EXPLOSION PROOF ENCLOSURE; ALSO KHL / KSHL / KSLL

Application of Model KLCE:
The Kenco KLCE utilizes the operating principles of both the oil level controller and the electric switch. Switch trips when oil level drops 3/4" below centerline of sight window.

Application of Model KHL:
The Kenco KHL is constructed with one level switch, which will alarm at 3/4" above centerline, and will also alarm at 3/4" below centerline.

Application of Model KSHL:
The Kenco KSHL is constructed with 2 independent switches, one for high level alarm 3/4" above centerline and another for low level alarm at 3/4" below centerline.

Application of Model KSLL:
The Kenco KSLL is constructed with 2 independent switches for low level trip points of 5/8” and 7/8” below centerline.

Standard Materials of Construction:
Valve Seat: Nitrile (Fluorocarbon also available)
Housing and Valve Orifice Material: Aluminum
Float Material: Closed Cell Polyurethane
Oil Inlet Screen: 20 Mesh Brass Cloth
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

Process Connections:
Oil Inlet Connection Size: 1/2” FNPT
Oil Outlet Connection Size: (3) 3/4” FNPT

Oil Inlet Data:
Static Head Pressure Range: 2–25 Feet
High Pressure Models:
HPA: 10–35 psi
HPB: 36–70 psi

Flow Rate Test Results:
(Standard unit tested at 32°F, SAE 30)
2’ Head: 1.45 GPH
4’ Head: 2.46 GPH
6’ Head: 3.49 GPH
(HPA unit tested at 32°F, SAE 30)
10 psi: 4.09 GPH
(HPB unit tested at 32°F, SAE 30)
36 psi: 3.38 GPH
70 psi: 6.92 GPH

Electric Switch Specifications:
Switch Trip Point: See Application Notes
Switch Rating: 15 amp, 125/250/480 VAC
0.5 amp, 125 VDC; 0.25 amp, 250 VDC
1/8 hp, 125 VAC; 1/4 hp, 250 VAC
Max. Temp: 180°F/ 82°C
Electrical Connection Size: 1/2” FNPT
Circuitry: Single Pole Double Throw

Also Available:
DPDT: Double Pole Double Throw Switch (KLCE/KHL only)
SYN: Synthetic Oil Applications—Contact Kenco with Type and Specific Gravity of oil used in the application.

MODEL KLCM OIL LEVEL CONTROLLER WITH ELECTRIC SWITCH IN CSA® TYPE 4 ENCLOSURE

Application of Model KLCM:
The Kenco KLCM utilizes the operating principles of both the oil level controller and the electric switch. Switch trips when oil level drops 3/4” below centerline of sight window.

Applications:
Intrinsically safe applications with an approved safety barrier.

Standard Materials of Construction:
Valve Seat: Nitrile (Fluorocarbon also available)
Housing and Valve Orifice Material: Aluminum
Float Material: Closed Cell Polyurethane
Oil Inlet Screen: 20 Mesh Brass Cloth
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

Process Connections:
Oil Inlet Connection Size: 1/2” FNPT
Oil Outlet Connection Size: (3) 3/4” FNPT

Oil Inlet Data:
Static Head Pressure Range: 2–25 Feet
High Pressure Models:
HPA: 10–35 psi
HPB: 36–70 psi

Flow Rate Test Results:
(Standard unit tested at 32°F, SAE 30)
2’ Head: 1.45 GPH
4’ Head: 2.46 GPH
6’ Head: 3.49 GPH
(HPA unit tested at 32°F, SAE 30)
10 psi: 4.09 GPH
(HPB unit tested at 32°F, SAE 30)
36 psi: 3.38 GPH
70 psi: 6.92 GPH

Electric Switch Specifications:
Switch Trip Point: See Application Notes
Switch Rating: 11 amp, 277 VAC
0.5 amp, 125 VDC
0.25 amp, 250 VDC
1/3 hp, 125/250 VAC
Max. Temp: 180°F/ 82°C
Electrical Connection Size: 1/2” FNPT
Circuitry: Single Pole Double Throw
Switch Test Button: Standard

Also Available:
SYN: Synthetic Oil Applications—Contact Kenco with Type and Specific Gravity of oil used in the application.
MODEL SPECIFICATIONS

MODEL KES ELECTRIC SWITCH IN EXPLOSION PROOF ENCLOSURE; ALSO KHL-ES/KSHL-ES/KSLL-ES

Application of Model KES:
The Kenco KES monitors the oil level in the crankcase and signals shut down in case of low oil level. Switch trips when oil level drops 3/4” below centerline of sight window. It has no oil level controller function.

Application of Model KHL-ES:
The Kenco KHL-ES is constructed with one level switch, which will alarm at 3/4” above centerline, and will also alarm at 3/4” below centerline.

Application of Model KSHL-ES:
The Kenco KSHL-ES is constructed with 2 independent switches, one for high level alarm 3/4” above centerline and another for low level alarm at 3/4” below centerline.

Application of Model KSLL-ES:
The Kenco KSLL-ES is constructed with 2 independent switches for low level trip points of 5/8” and 7/8” below centerline.

Standard Materials of Construction:
Housing Material: Aluminum
Float Material: Closed Cell Polyurethane
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

MODEL KLCP OIL LEVEL CONTROLLER WITH PNEUMATIC SWITCH

Application of Model KLCP:
The Kenco KLCP utilizes the operating principles of both the oil level controller and the pneumatic switch. Switch opens when oil level drops 3/4” below centerline of sight window.

Applications:
Remote or offshore locations with no electric power

Standard Materials of Construction:
Valve Seat: Nitrile (Fluorocarbon also available)
Housing and Valve Orifice Material: Aluminum
Float Material: Closed Cell Polyurethane
Oil Inlet Screen: 20 Mesh Brass Cloth
Sight Window: U.V. Stabilized Transparent Nylon or Hermetically Sealed Glass (optional)

Oil Inlet Data:
Static Head Pressure Range: 2–25 Feet
High Pressure Models:
HPA: 10–35 psi
HPB: 36–70 psi

Process Connections:
Oil Inlet Connection Size: 1/2” FNPT
Oil Outlet Connection Size: (3) 3/4” FNPT

Flow Rate Test Results:
(Standard unit tested at 32°F, SAE 30)
2’ Head: 1.45 GPH
4’ Head: 2.46 GPH
6’ Head: 3.49 GPH
(HPA unit tested at 32°F, SAE 30)
10 psi: 4.09 GPH
(HPB unit tested at 32°F, SAE 30)
36 psi: 3.38 GPH
70 psi: 6.92 GPH

Pneumatic Switch Specifications:
Switch Trip Point: See Application Note
Maximum Air Valve Inlet Pressure: 100 psi
Max. Temp: 180°F/ 82°C
Air Inlet Connection Size: 1/4” FNPT
Air Exhaust Connection: 1/4” O.D. Tube X 1/8” MNPT Tube Fitting
Switch Test Button: Standard

Also Available:
SYN: Synthetic Oil Applications—Contact Kenco with Type and Specific Gravity of oil used in the application.

MODEL KPS PNEUMATIC OIL LEVEL SWITCH
Same as model KLCP except with no oil level controller function.
MODEL DIMENSIONS
(Refer to Kenco website for models not shown)

Model K512 / K512-TB / K512HL / K512HL-TB Oil Level Controller with Case-to-Ground Electric Switch Contact

Model KLCE / *KES / KHL / *KHL-ES / KSHL / *KSHL-ES / KSSL / *KSSL-ES Oil Level Controllers with Switch in Explosion Proof Enclosure
*Models KES / KHL-ES / KSHL-ES / KSSL-ES are Electric Oil Level Switches Only and have No Oil Inlet Connection and No Oil Level Controller Function

Model KLCP Oil Level Controller with Pneumatic Oil Level Switch

Model KLCM Oil Level Controller with Electric Switch in CSA® Type 4 Enclosure

CONTROLLER-TO-CRANKCASE MOUNTING ADAPTERS
(Note: "\(\checkmark\)" denotes controller mounting surface.)

**TYPE 9**
Universal Mounting Bracket for Any Engine

**TYPE 11**
For Mechanical Lubricator
(Drill 25/32"Ø holes in lubricator housing to mount)

**TYPE 12**
For 1/2" Pipe

**TYPE 14**
Cooper Superior Compressor (Formerly White)

**TYPE 17**
Similar to type 27 except for use with old Waukesha engines having inspection door with (1) mounting bolt

**TYPE 24**
For Ariel (2/4 Throw) JGE, JGH, JGK, and JGT Compressors

**TYPE 27**
Waukesha VHP Engines
(Supplied with all mounting hardware/seals)

## CONTROLLER-TO-CRANKCASE MOUNTING ADAPTERS SPECIFICALLY FOR MODEL KS12 CONTROLLERS

| -9U*   | Universal Mounting Adapter |
| -A     | Arrow C46, C66, C106 and C245 |
| -AJAX  | Ajax, Lufkin Made Before 1-1-63, Superior and Other Crosshead Type Engines, and Tri-Plex Pumps With 1/2" Drains |
| -FM    | Fairbanks Morse ZC, 118, 208, 346, 503, and 739 |
| -L795  | Arrow L-795 |
| -ML    | For Side Mounting on Mechanical Lubricator when there is No Extra Pump Pocket |
| -SML   | Mounts on the end of the McCord Mechanical Lubricator next to the Filler Cap |
| -W*    | Witte B.C & F28, F32 & F42 |
| -W99*  | Witte 99 with Oil Gauge Bolted to Engine |

* Indirect mounted controllers/switches require an equalizing line for proper operation.
OPERATING PRINCIPLE
The Fire Safe Oil Control System provides two spring-loaded, thermally actuated valves. In the event of a fire, valves automatically close, stopping the flow of oil from the crankcase of the engine and the reserve oil supply for the controller. Because the Oil Level Controller will melt during a fire, this prevents the addition of oil from the crankcase and the controller’s reserve oil supply to the fire.

BENEFITS
• Lower insurance rates
• Protection in case of fire to equipment
• Protection of personnel
• Protection of environment
• Prevents oil supply from feeding a fire

SPECIFICATIONS
Valve Body – Zinc Plated Carbon Steel
Thermal Fuse Melting Temp. – 360°F
Spring – Stainless Steel
Valve Plunger – Carbon Steel
Seal Material – Fluorocarbon
Connection Size: 1/2” FNPT or 3/4” FNPT (other sizes available)

TYPICAL INSTALLATION
Inlet Side:
Install the Model 50-KFS as close to the controller inlet (or Kenco Low Flow Meter) as possible.

Outlet Side:
Install the Model 75-KFS as close to the engine crankcase as possible.

*Note: Flow through valve is bidirectional.

INLET SIDE:
In case of a fire, stops oil from flowing from oil reserve supply.

OUTLET SIDE:
In case of a fire, stops back flow of oil from crank case.

### Ordering System

**KLCE** — 9 — **HPA** — **FS** — **V** — **GW** — **K**

**Model**

**Mounting Adapters** (Leave Blank for No Mounting Adapter)
Note: Add “DT” in front of adapter number for housing that is drilled and tapped for a mounting adapter with no mounting adapter is supplied (Example: KLCE-DT9).

**Inlet Oil Pressure**
(Leave Blank for Static Head Pressures <10 PSIG or Models with No Oil Controller Function)
- **HPA**: 10-35 PSIG — N/A on Models with No Oil Controller Function
- **HPB**: 36-70 PSIG — N/A on Models with No Oil Controller Function

**Fire Safe Valves** (Leave Blank for No Fire Safe Valves)
- **FS**: Supplied with Fire Safe Valves
- **FSN50**: Fire Safe Unit Supplied without 1/2” NPT Fire Safe Valve

**Seal Option** (Leave Blank for Standard Buna Seals)
- **V**: Fluorocarbon Seals

**Sight Window Option** (Leave Blank for Standard Nylon Sight Window)
- **GW**: Glass Window

**Hose Kit Option** (Leave Blank for No Hose Kit)
- **K**: Hose Kit Consisting of 6’ of 3/4” I.D. Hose, (2) 1/2” NPT Hose Barbs, (2) 3/4” NPT Hose Barbs, and (4) Hose Clamps.

**Synthetic Oil Option**
Contact Kenco with the Type and Specific Gravity of synthetic oil being used in the application

**Example Order Designation:**
KLCE-9-HPA-FS-V-GW-K is an Oil Level Controller with S.P.D.T. Electric Switch in Explosion Proof Enclosure, a Universal Mounting Adapter, a High Pressure Inlet Valve rated for 10-35 PSIG, Fire Safe Valves, Fluorocarbon Seals, Glass Window, and a Hose Kit.
